

Access UBS POS June 2022 Release Note

About these Release Notes

Welcome to the Access UBS POS Release Notes!

This document outlines all you need to know about this version of the software, it will provide you with a summary of the changes, and by using the hyperlinks you will be able to easily navigate through the document to find out detailed information about the new features, including screenshots and videos where appropriate.

Please refer to the table of contents for a full list of what is included.

About Access UBS POS

Access UBS POS is a point-of sale cash register for retail sales, services, and rental businesses. This system can be operated with or without bar code equipment. During the basic transaction, product codes are entered or scanned into the transaction and the screen instantly displays the quantity, price, and product description.

Integration is allowed between Access UBS POS and Access UBS Accounting & Billing.
